

Golden Digital

Mix More Media!

Golden digital mixed media aims to combine traditional techniques in painting and drawing with the increasing popularity of producing images through photography and digital printing. They have produced a range of 3 digital grounds and 2 topcoats that are designed to take a digital image manipulated in programmes like Photoshop that are printed from an inkjet printer. The grounds will turn most relatively flat surfaces into an ink-jet printable surface giving texture and character to the final image and opening up new possibilities in mixed media and collage. Surfaces that can be used range from most types of paper, leather, and wood veneer.

The gel topcoats come in gloss and semi gloss surfaces and form a non-removable protective top coat which will protect the image from dirt and harmful ultraviolet light, they can also be used to add texture and can be used in conjunction with Golden's other acrylic varnishes and mediums for added protection and further effects. For application apply the ground in a thin layer with a foam brush or roller and clean up with soap and water. Further details of how to use the mixed media range and advice on printers can be found on our website [www.lawrence.co.uk](http://www.lawrence.co.uk).

Mix More Media Trial Sets  
909230 All six new products in 119ml pots **£19.95**

Grounds

Digital grounds come in 4 sizes:

236ml	<b>£12.50</b>	946ml	<b>£35.95</b>
473ml	<b>£22.50</b>	3.78L	<b>£99.95</b>

Digital Ground White (Matte)

This is a porous opaque ground which can be used on a wide variety of surfaces. As a porous surface it allows the ink to dry rapidly and is the most ideal for beginners trying it out for the first time, it gives the best trouble free applications on a wide range of materials. (It is best for un-modified printers that still have 'pizza' wheels or ejection rollers). Refer to our fact sheets for further advice.

935635 236ml	935637 946ml
935636 473ml	935638 3.78L

Digital Ground Clear Gloss

This ground gives a clear, gloss sheen to most absorbent surfaces. It allows the underlying image to show through but the prints will dry more slowly which can cause problems with older style printers. Therefore it is not recommended for non porous surfaces but surfaces that are very porous like paper shouldn't cause a problem. Refer to our fact sheets for further advice.

935645 236ml	935647 946ml
935646 473ml	935648 3.78L

Digital Ground for Non-Porous Surfaces

This ground is similar to the clear gloss ground but is formulated for non-porous surfaces such as aluminium or plastic. Again this should be used with newer style printers. Refer to our fact sheets for further advice.

935665 236ml	935667 946ml
935666 473ml	935668 3.78L

Topcoats

Topcoats come in 4 sizes:

236ml	<b>£16.95</b>	946ml	<b>£49.95</b>
473ml	<b>£29.95</b>	3.78L	<b>£125.95</b>

Gel Topcoat Gloss

A clear ground with a gloss sheen for use on most absorbent surfaces.

937465 236ml	937467 946ml
937466 473ml	937468 3.78L

Gel Topcoat Semi Gloss

A clear ground for use on non porous surfaces.

937475 236ml	937477 946ml
937476 473ml	937478 3.78L
