## Stones Lithography Products

# STONES

Stones Crayons from the USA have a number of advantages over other crayons: uniquely smooth and sensitive for drawing with very little drag. Stones crayons can be sharpened with an ordinary pencil sharpener. The 1/4" crayons can be fitted into a special holder, but even without the holder they will not melt in your hand. A 'no mess' crayon at last! All crayons are numbered so that you always know which crayon to choose.

Tablet crayon

Perfect for laying down broad textures, patterns and large tonal areas.
